This figure is a topographic map of a coastal area, likely the Mediterranean coast of Israel. The map features several contour lines representing different elevations. Key elevation values labeled on the map include 150, 193, and 250 meters above sea level.

 Specific locations and features are labeled in Hebrew:

- בַּת חֶפְרָה** (Bat HaHefra) is located in the upper right quadrant, near a contour line at approximately 151 meters.
- כִּיר 9** (Kir 9) is a prominent feature in the lower right, marked by a contour line at approximately 151 meters.
- גַּעֲשָׂה וְכֹבֵת עַתִּידִית** (Gauss and Future Cobet) is a label positioned between Kir 9 and another contour line at approximately 151 meters.
- לְמַעַן** (LeMaan) is located in the upper left, near a contour line at approximately 151 meters.

 The map also contains several '+' symbols, which typically indicate surveying control points or benchmarks. The overall terrain shows a mix of coastal flatland and more rugged, elevated areas inland.
